SMALL AIR COMPRESSORS

Safety Instructions

1. Read all safety instructions before installation.
2. Disconnect power source from all electric models and disconnect lead to spark plug on gas units before servicing or cleaning units.
3. Do not remove belt guard. Belt guard must remain mounted at all times while unit is in operation.
4. Release all tank pressure prior to repairs, maintenance, or mounting auxiliary components.
5. Do not adjust safety valve.
6. Do not permit children or unauthorized persons to use the unit at any time.
7. Do not put alcohol or other combustible materials in the air receiver.
8. Never operate the compressor at pressures or speeds in excess of those recommended by the factory.
9. Some elements on the air compressor may be quite warm in normal operation. Do not touch or permit combustible materials to come in contact with these components.
10. Do not smoke or use any open flame near gas powered units.
11. Do not attempt to fill gas tank while engine is running and do not overfill gas tank or spill gas on hot engine.
12. Wear eye protection when operating the compressor.
13. The compressor should be operated in a dry, clean, and well ventilated area.
14. Compressed air blast should never be aimed at anyone because it can cause serious injury. Keep children away.

Need It. Rent It!
