## Hande Closet Auger

1. Cable is inserted into bowl with crank handle extended to its limit.
2. Turn the crank handle clock-wise to work the cable through the passage until the obstruction is either forced down the line or caught and removed by pulling back on the handle.

Note: Do not force the cable through bends - if the cable head becomes lodged continued pressure can cause cable breakage. If cable becomes lodged, turn the crank counter clock-wise to relieve tension and start procedure again.

**Need It. Rent It!**
